

MUHAMMAD WALEED

Lahore, Pakistan — waleednaeem133@gmail.com — +92-327-8666254 — muhammadwaleed.site — github.com/W-N-R

PROFESSIONAL SUMMARY

Motivated Electrical Engineering undergraduate at FAST NUCES with hands on experience in Python-based AI/ML development, C++ embedded systems, and hardware prototyping. Currently completing a NAVTTC certified AI/ML programme covering Machine Learning, Deep Learning, NLP, and Python data science libraries. Founder of WNR Production Studio, with practical experience in firmware development, automation, and full stack web projects. Actively building a custom FDM 3D printer from firmware to mechanical assembly. Eager to contribute to AI driven and embedded systems roles in innovative tech environments.

TECHNICAL SKILLS

Programming Languages

- Python (OOP, scripting, automation)
- C++ (OOP — Expert level)
- HTML / CSS / JavaScript (Basics)

AI / ML & Data Science

- Machine Learning: Linear, Polynomial & Logistic Regression
- NumPy, Pandas, Matplotlib, Seaborn
- NLP: NLTK, SpaCy, Tokenization, POS/NER
- Deep Learning (Fundamentals)
- Kaggle datasets & model evaluation

Embedded Systems & Hardware

- Arduino (Nano, Mega, Uno) — C++ Firmware
- ATmega2560, RAMP 1.4, DRV8825 drivers
- NEMA 17 Stepper Motors, Hotend wiring
- Circuit simulation: Proteus, PSPICE, Altium
- MATLAB, Logic Works 5

Tools & Other Skills

- Version Control: Git & GitHub
- OS: Linux (Debian), Windows
- Blender 3D, Adobe Photoshop, Illustrator
- Canva, Figma, Microsoft Office Suite
- Scrapy (web scraping), PCB Design (Altium)

PROFESSIONAL EXPERIENCE

Python Developer Intern

Arch Technologies (Remote)

Apr 2026 – May 2026

Intern ID: ARCH-2604-0675

- Developed Python-based automation and scripting solutions in a professional remote environment.
- Applied data-handling techniques using Python libraries as part of real-world development tasks.

C++ Developer Intern

CodeAlpha (Remote)

Dec 2025 – Jan 2026

Student ID: CA/DE1/4773

- Completed a comprehensive virtual C++ programming internship, demonstrating strong OOP expertise.
- Collaborated with team members on software tasks, receiving a formal recommendation for adaptability.
- Delivered project work that earned a verified certificate of completion from CodeAlpha.

Founder & Lead Developer

WNR Production Studio, Lahore, Pakistan

Jan 2023 – Present

- Founded a multidisciplinary studio spanning embedded systems, branding, 3D animation, and web development.
- Engineered a Car Showroom Sales System in C++ (OOP) — full inventory, sales, and customer data management; documented on GitHub.
- Developed full-stack websites with HTML/CSS deployed on GitHub Pages, achieving 1,500+ user visits.
- Designed and deployed 3D animations, branded intros, and short films using Blender.
- Provided Social Media Management for a community Ramazan drive (certified contribution, 2025).

Production Manager & Computer Organiser

Vintex Traders (Pvt. Ltd), Lahore, Pakistan

Aug 2023 – Present

- Implemented Excel-based financial models that improved budget efficiency by 15%.
- Oversaw production coordination, accounts management, and digital filing integrity.

EDUCATION

Bachelor of Science — Electrical Engineering

Aug 2024 – Expected Aug 2028

FAST-NUCES (National University of Computing and Emerging Sciences), Lahore

- Pursuing specialisation in Computer Engineering; coursework includes OOP, Circuit Theory, Embedded Systems Design, Engineering Workshop.
- Active member of coding, embedded-systems, and robotics societies; practical simulation using PSPICE, Proteus, MATLAB, and Altium.

Certificate — AI (Machine Learning, Deep Learning & Communication)

Feb 2026 – May 2026

NAVTTTC (National Vocational & Technical Training Commission), Lahore

- Covered Python Fundamentals, OOP in Python, Descriptive Statistics, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLP (NLTK/SpaCy), Linear & Logistic Regression, Deep Learning Foundations.
- Completed 6+ graded assignments and projects including a Student Management System, ATM Machine simulator, Python Calculator, and Python List operations — all graded $\geq 88/100$.

FSc Pre-Engineering

Feb 2022 – Apr 2024

KIPS Education System

Grade: A+

PROJECTS

Custom FDM 3D Printer (In Progress)

2026

- Designing and assembling a full FDM 3D printer using ATmega2560 (Arduino Mega), RAMP 1.4 shield, DRV8825 stepper drivers, NEMA 17 unipolar motors, and a hotend assembly.
- Configuring Marlin firmware for motion control, temperature regulation, and G-code interpretation — end-to-end hardware-firmware integration.

4×4×4 LED Cube Display

2024

- Built an Arduino Nano-driven 3D LED cube using multiplexing in C++; supports customisable animations. Full code and documentation on GitHub.

Arduino Automation Hub (Smart Home Prototype)

2023

- Developed a sensor-integrated home automation system using Arduino with mobile control interface.

Car Showroom Sales System (C++)

2023

- Console-based C++ application with modern OOP design for inventory, customer, and transaction management; published on GitHub.

CERTIFICATIONS

- **Python** — Kaggle (2026) — **Python Basics** — Uniathena (2026) — **PCB Design Basics** — Altium (2026)
- **C++ Virtual Internship** — CodeAlpha (2026) — **Foundations of Data** — Coursera (2025)
- **Cybersecurity Awareness** — HP (2024) — **Effective Leadership** — HP (2024) — **Presentation Skills** — HP (2024)
- **Social Media Manager** — Ramazan Community Drive (2025)

ADDITIONAL INFORMATION

Languages: English (Professional), Urdu (Native), Arabic (Reading — Hifz-e-Quran)
